

SECURE YOUR LOAD! It's the law.

How to properly secure your load:

- Put lighter weight items at the bottom.
- Use tarps, straps, rope, bungee cords or netting.
- Tie larger items directly to your vehicle.
- Don't overload your vehicle.
- Unsecured loads are subject to \$25 fee.

IMPORTANT: DO NOT REMOVE TARP UNTIL YOU REACH THE TIPPING AREA. THIS PREVENTS LITTERING ON SITE!

It's the law. California State Vehicle Code Sections 23114. (a) and 23115. (a) require that loads be properly covered or secure.

It's litter. Litter and debris that falls out of truck beds is unsightly, and can end up in local waterways and harm wildlife.

It costs you money. Fines may be assessed for both unsecured loads and littering. (CA State Vehicle Code Sections 23114.(a) and 23115.(a) and CA Penal Code 374.3 (a-j)).

It saves lives. In 2010, about 51,000 accidents were caused by items that fall out of vehicles, injuring 10,000 people and resulting in 440 fatalities. (National Highway Traffic Safety Administration: GAO-13-24 Unsecured Loads).
